Codeforces — CodeChef — LeetCode

SUMMARY

FullStack and Generative AI developer with strong DSA fundamentals (200+ problems solved). Experienced in architecting full-stack applications, optimizing RAG pipelines, and integrating LLMs using FastAPI, React, and PostgreSQL/pgvector. Proficient across system layers, from data layout and containerization to cloud deployment.

EDUCATION

Indian Institute of Information Technology, Pune Pune, MH
B.Tech in Computer Science and Engineering (CGPA: 8.68) 2024 – Present

TECHNICAL SKILLS

- **Languages:** C/C++, Python, Java, JavaScript, SQL
- **Backend & GenAI:** FastAPI, Node.js, Express.js, RAG Pipelines, Gemini/OpenAI API, Vector Search
- **Frontend & UI:** React, Next.js, TailwindCSS, HTML5/CSS3
- **Databases & Caching:** MySQL, PostgreSQL, pgvector, Supabase, MongoDB
- **Tools & DevOps:** Docker, Git/GitHub, Postman, Linux

PROJECTS

- RecruitIQ – AI-Powered ATS Platform** Code
- FastAPI, React, PostgreSQL, pgvector, Gemini API, Docker, NumPy
- Built an AI-powered ATS for recruiters that ranks candidates using **embedding-based semantic search**.
 - Implemented semantic retrieval with **pgvector** and cosine similarity for resume matching.
 - Used **Gemini API** to parse resumes into structured candidate profiles.
 - Developed a hybrid **reranking algorithm** combining semantic similarity with recruiter-defined criteria.
- CareerHex – AI-Powered Career Intelligence Engine** Code — Demo
- Next.js, Supabase, Auth.js, OpenAI API, GitHub API, LeetCode GraphQL
- Developed a career analytics engine parsing real-time developer metrics to **quantify technical role readiness**.
 - Created an **automated LLM gap-analysis engine** that scans codebases and surfaces targeted algorithmic weaknesses.
 - Designed an interactive, **stateful roadmap generation framework** built on Supabase-backed persistence layers.
 - Authenticated users securely via **multi-provider OAuth protocols** linked directly to third-party tracking states.
- PlayerArea – Real-time Multi-User Game Engine** Code — Demo
- React, Node.js, Express.js, Socket.io, WebSockets, TailwindCSS, Render
- Built a real-time collaborative drawing platform supporting multi-user rooms with synchronized canvas updates.
 - Implemented bidirectional communication using **WebSockets (Socket.io)** for instant state synchronization across connected clients.
 - Developed backend room management and session isolation to support multiple independent collaboration spaces.
 - Deployed the full-stack application on **Render**, enabling public access and real-time collaboration.

COMPETITIVE PROGRAMMING & ACHIEVEMENTS

- **Codeforces:** Pupil (Max Rating: 1265)
- **CodeChef:** 3-Star Developer (Max Rating: 1612)
- **LeetCode / GFG:** Successfully solved over **200+ structural algorithmic problems**.
- **Academic:** Achieved a **99.28 percentile** in JEE Main; Ranked **1183** in TS EAPCET.

CERTIFICATIONS

- **Google AI Essentials Specialization** – Google Credential — Issued: June 2026
Prompt engineering, responsible AI, workflow automation, and practical generative AI applications.
